MEMORANDUM

To: Chock Woodruff
Copy: Brian Hunt
From: Tom Grimshaw
Subject: Geologic Mapping In and Around the Anthem Tract

Thank you for your interest in the geology at and near the Anthem Tract. As you know, Brian Hunt and I have been doing detailed geologic mapping of the Mountain City Quadrangle for some time. We are using primarily air photo stereo pairs with field verification of outcrops.

Attachment A shows the mapping that has been accomplished in the quadrangle at and around the Anthem Tract. The air photos for the area are included in Attachments B1 and B2. As you can see, uncertainties remain for a couple of the fault blocks near the Tract. It will be a pleasure to make a field visit to verify the existing mapping and clarify the geologic units in the fault blocks if you can arrange for access.
